

LUMICHRON BRACKET CLOCKS

Lumichron bracket clocks feature a wall or ceiling mounted double-faced clock with internal LED illumination and fully automatic, hands-free time controls. Standard sizes in 6" increments 18" to 42" in Modern styles of a fixed size 30" diameter Victorian with a header panel.

▲ BENEFITS OF BRACKET CLOCKS

Commonly used where space on a sidewalk is not usable, these clocks mount above a store-front and project out as a useful 'attraction' or are used in a common area indoors and suspend from a ceiling such as a station lobby. Any transit facility can use a good, accurate bracket clock!

▲ INSTALLATION

All bracket clocks are either mounted on a wall or ceiling so provisions for such installation need to be taken into account. Each clock is made-to-order, so if mounting on a column, hollow wall, or ceiling, the clock will be designed for the correct application. All require a remote master clock with a low-voltage wired connection.

▲ STANDARD FEATURES

- All-aluminum cabinet construction, powder coated in stock architectural finishes
- Tempered glass crystals for haze-free lifespan
- Fully automatic time controls with optional GPS synchronization
- Internal illumination with 100,000 hr sign-grade LED's
- Customizable dial designs with header panel options if needed
- Modern styles in 6" increments from 18" to 42" (30" is most popular)
- A standard Victorian bracket clock with a 30" OD head with header panel, projects 48" overall and is 48" overall height
- Options for building into a custom sign, mounting on a corner, etc.

▲ CONSIDERATIONS WHEN ORDERING

- Height from grade
- Wiring connections (a wire has to feed through the wall/ceiling)
- Wall/ceiling construction for anchors/bolts, etc.
- If power is not available, self-setting GPS synchronized industrial movements powered by 5 year DD lithium batteries are available

CRAFTSMANSHIP

Every clock is built-to-order, by people passionate about the craft of building time for clients. Always personal, always on-time, and always on-budget.

TRADITION

From old world Roman style to contemporary modern, an analog clock is a notable feature bringing importance and comfort to the building

TECHNOLOGY

All clocks are digitally controlled, synchronized with GPS or NTP for accuracy
